After Hours Phone Assistant Options

Nursing Styles · one page summary

What it does

Compares the services that could answer your office lines after hours (weeknights, weekends and holidays), with Centratel staying in place as the live backup. It shows the cost, privacy and effort for each so you can pick one.

What every option must do

- Sign a HIPAA Business Associate Agreement before any real call.
- Look up caregivers and visits in AxisCare during the call.
- Transfer callers to a person and alert on-call staff until someone answers.
- Record calls with the required Florida recording notice.

The short list

- **Retell AI:** strongest overall fit. About $165 to $310 a month, HIPAA agreement included, no contract.
- **HeyHomeCare:** built for home care and connects to AxisCare. Strong fit, price by quote.
- **AxisCare Axi Assist:** built into AxisCare, easiest setup, but narrow and new. Price by quote.
- **Goodcall:** simple, $299 a month, but lighter on escalation.
- **Not a fit:** Smith.ai (no HIPAA), Vapi (about $2,000 a month extra for HIPAA), Synthflow (large annual contract).

Estimated volume

About 300 to 600 after-hours calls a month, roughly 1,000 to 2,000 minutes.

What you need to decide

- Which option to test first.
- Approve requesting AxisCare API access, which every option needs.
