Intake Call Script

ParkLynn Circle Construction & Remodeling · one page summary

What it does

A friendly, consistent way to answer new calls and website leads, ask the right questions, and send the best leads to you quickly, with every answer saved in HubSpot.

The main steps

1. **Greet** warmly. Many callers are seniors or adult children.
2. **Ask about the project:** type, scope, city, who lives there, any safety concern, timeline, budget range, decision maker and how they heard of you.
3. **Score the lead** as Hot, Warm or Cold.
4. **Next step:** Hot goes to you the same day, Warm gets a free in-home assessment offer, Cold gets general info.

Goes straight to you

- Urgent safety needs, like a recent fall or a hospital discharge.
- Commercial or ADA work, and insurance, VA, grant or financing questions.
- Realtors and referral partners, upset callers, and current customers.

Ground rules

- Never quote a price or date. You give those after seeing the space.
- Never promise grant or VA approval.

What you need to decide

- The budget ranges you are comfortable asking about.
- How far outside Pinellas County you will travel.
- Follow up times (same day for Hot, 2 business days for Warm).
