Caregiver Recruiting and Screening Kit

Nursing Styles · one page summary

What it does

A simple, repeatable hiring process so every applicant gets the same fair questions, the same scoring, and a quick, friendly response from either office. It comes with a scorecard spreadsheet that totals scores automatically.

The main steps

1. **Application received** through the AxisCare application page.
2. **Acknowledge** the applicant within 1 business day.
3. **Phone screen** of 15 to 20 minutes within 2 business days, using the standard questions.
4. **Score and decide** the same day, with clear knockout criteria.
5. **Interview** with management within 3 business days.
6. **Conditional offer**, then background screening and onboarding before the first visit.

What is included

- Minimum qualifications for each role: companion, HHA, CNA, LPN and RN, following Florida rules.
- Standard phone screen questions with what a good answer looks like.
- Ready-to-use messages for every step.

What you need to decide

- Who runs phone screens and who interviews at each office.
- The pay ranges and incentives to mention on calls.
- Whether any agency standards (for example, a vehicle with air conditioning) should change.
